Description

When Prewikka try to show events which contains russian text "Множественные риски" in "alert.classification.reference().name", it crash with error:

Prewikka internal error

KeyError: u'\u041c'

Symbol "\u041c" = Cyrillic capital letter [em] "M" (http://unicode-table.com/en/search/?q=%5Cu041c)
However there isn't errors with russian symbols in: "alert.source().node.name", "alert.source().process.name", "alert.target().file().path", etc
