Description

Hi there,

get the following exception message of the DEBUG on the server (webserver prewikka-httpd) every time I access the "heartbeats" page by browser. I am using prewikka v0.9.2.

Maybe the same problem as reported in Ticket [#121](#) ?

And is there a connection to the problem I posted at the mailing list ([prelude-user] Wrong sensor status in prewikka 0.9.2) ?

Thanks and Regards.
