Description			
i think it would be nice to have an option to perform 'dig -x' (in addition to filter/traceroute/whois) when you click on an ip address in the alerts section of prewikka.

(In r8395) - Allow to define unlimited number of command rather than only the one we know about (fix [#134](#)).

- Modify Alert/Heartbeat listing so that they include a source/target/analyzer information link, but only do so when the address type permit it (fix [#76](#)).

- Link to prelude-ids.com portdb lookup instead of broken portdb database (fix [#162](#)).

- Include information for all the IDMEF-File object carried in the alert.

- Always take care of the "external_link_new_window" configuration parameter.
