

Libprelude - Bug #150

A number of issues with command line options

Target version:	0.9.8		
Resolution:	fixed		

Description

i ran into a number of problems when trying to set up a prelude-manager under a different profile name. some options cause problems or must be used differently than described.

1. the usage of prelude-manager says `prelude --profile=ARG` but that does not work. Removing the `=` and writing `--prelude --profile ARG` works ok.
2. using `--config=ARG` gives a warning: **Invalid option - "config" (0)**. but the specified config-file seems to be used anyway.
3. using two options from the `--prelude` subcategory without the category gives a segfault. adding another `--prelude` (i.e. saying `--prelude --profile foo --prelude --heartbeat-interval=60` instead of `--prelude --profile foo --heartbeat-interval=60` works ok). for the other categories, you can give multiple category-options per category.
4. `--prelude --profile foo` (and maybe others) only works if specified before `-d`

some of this behaviour may be intended, but at least it should be documented...

there could be more issues with the command-line option handling. i did not test this systematically. these are just the ones i ran into...

this was done with prelude-manager-0.9.4.1 and libprelude-0.9.7.2

History

#1 - 04/21/2006 01:00 PM - Yoann VANDOORSELAERE

- Status changed from New to Assigned

Reword description for readability. Reword summary since this is not prelude-manager specific.

#2 - 05/01/2006 02:14 PM - Yoann VANDOORSELAERE

Please try changeset r8171, which should fix point 1 and 3. I am not able to reproduce point 4, can you confirm it happen with the patch applied ? Point 2 will be a separate fix.

#3 - 05/03/2006 08:13 AM - Yoann VANDOORSELAERE

- Status changed from Assigned to Closed

- Resolution set to fixed

Marking as closed. Please open a separate ticket for point 4 if you are still able to reproduce it with r8171 applied.

#4 - 04/29/2009 12:25 PM - Yoann VANDOORSELAERE

- Project changed from PRELUDE SIEM to Libprelude

- Category deleted (1)

- Target version deleted (0.9.8)
