

Libprelude - Bug #187

gnutls error registering new sensors

12/31/2006 10:57 AM -

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Yoann VANDOORSELAERE	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	0.9.13		
Resolution:	fixed		

Description

Hello all,
Im not able to register more then one sensor on management server. I get always

```
- connecting to registration server (10.100.100.2:5553)...  
- [[GnuTLS]] handshake failed: [[GnuTLS]] internal error..
```

and I dont know what is going wrong. Or maybe I do something wrong? Can someone tell me what are the way is to get more sensors installed then localhost?

What cause this error? I tried irc and google without success!

History

#1 - 02/05/2007 01:41 PM - Yoann VANDOORSELAERE

- Status changed from New to Assigned

This seem to be an SRP compatibility problem between different [[GnuTLS]] version.
A fix is under investigation.

#2 - 02/07/2007 02:55 PM - Yoann VANDOORSELAERE

- Status changed from Assigned to Closed

- Resolution set to fixed

(In r8800) Prefer anonymous authentication rather than SRP. We do this because there are compatibility issue with SRP between different [[GnuTLS]] version.
Should fix [#187](#).

#3 - 07/12/2007 03:14 PM -

- Status changed from Closed to Feedback

- Resolution deleted (fixed)

Replying to [comment:2 yoann]:

(In r8800) Prefer anonymous authentication rather than SRP. We do this because there are compatibility issue with SRP between different [[GnuTLS]] version.
Should fix [#187](#).

I've got the very same problem. I've installed all the 'latest' stuff.

```
lsb_release -a
No LSB modules are available.
Distributor ID: Debian
Description:   Debian GNU/Linux 4.0r0 (etch)
Release:      4.0r0
Codename:     etch
```

```
libgnutls-config --version
1.4.4
```

```
Enter the one-shot password provided by the "prelude-adduser" program:
- enter registration one-shot password:
- confirm registration one-shot password:
- connecting to registration server (172.15.75.1:16354)...
- [[GnuTLS]] handshake failed: Handshake failed.
```

#4 - 07/12/2007 03:16 PM -

Oops. Forgot to adjust e-mail address

#5 - 07/12/2007 03:52 PM - Yoann VANDOORSELAERE

Please detail the libprelude version, as well as prelude-adduser output (both on the sensor and on the prelude-manager side).

#6 - 07/12/2007 08:44 PM -

Sorry!

I need to go to prep. school again to improve my reading capabilities... Somehow I completely blocked out the part that says: "Go back to the server you want to register to, get the one-shot password and insert on your sensor machine..."

Having reread the stuff and done as it says everything starts working...

Just need to get used to the stuff, I guess...

#7 - 07/13/2007 10:43 AM - Yoann VANDOORSELAERE

- Status changed from *Feedback* to *Closed*

- Resolution set to *fixed*

Marking as closed again (configuration issue). Don't hesitate to modify the wiki documentation if you think it might avoid confusion.

#8 - 04/29/2009 12:25 PM - Yoann VANDOORSELAERE

- *Project changed from PRELUDE SIEM to Libprelude*

- *Category deleted (1)*

- *Target version deleted (0.9.13)*
