

PRELUDE SIEM - Bug #249

NameError: name 'PreludeDB' is not defined

08/02/2007 01:33 PM -

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Yoann VANDOORSELAERE	% Done:	0%
Category:	generic	Estimated time:	0.00 hour
Target version:			
Resolution:	wontfix		

Description

I cannot get pylude working. This is the traceback:

```
Traceback (most recent call last):
  File "pylude.py", line 9, in ?
    from Interface import Interface
  File "/home/root/src/svn.prelude-ids.org/pylude/trunk/Interface.py", line 3, in ?
    from [[MainWindowDialog]] import [[MainWindowDialog]]
  File "/home/root/src/svn.prelude-ids.org/pylude/trunk/MainWindowDialog.py", line 5, in ?
    from [[ConnectionSetupDialog]] import [[ConnectionSetupDialog]]
  File "/home/root/src/svn.prelude-ids.org/pylude/trunk/ConnectionSetupDialog.py", line 3, in ?
    from Prelude import *
  File "/home/root/src/svn.prelude-ids.org/pylude/trunk/Prelude.py", line 147, in ?
    class DB(PreludeDB):
[[NameError]]: name 'PreludeDB' is not defined
```

I guess I am missing something...

History

#1 - 08/02/2007 03:09 PM - Sebastien Tricaud

- Status changed from New to Closed
- Resolution set to wontfix

Pylude is not maintained anymore and is thus deprecated. All efforts are put into the web interface Prewikka.

However, if you want to help improving it you are more than welcome!
