#### Description

I'm using GNU make and compiling with gcc 3.4.6 ends up with the following error:

```

##### #1 - 02/07/2008 11:49 AM - Yoann VANDOORSELAERE

- Status changed from New to Closed

- Resolution set to fixed

(In r10151) Include libmissing and config.h, should fix compilation issue (fix [#278](#)).

##### #2 - 02/07/2008 11:51 AM - Yoann VANDOORSELAERE

Could you try the fix checked in r10151, and let us know whether it solve your problem?

##### #3 - 02/07/2008 01:44 PM -

Compiling finished und prelude-manager seems to work properly.

I checked out prelude-manger/trunk revision 10151, but there was no configure script. So I copied the files to prelude-manager-0.9.11.1 folder. Is this the default procedure?

**#4 - 02/07/2008 01:58 PM - Yoann VANDOORSELAERE**

Not really, trac let you download the diff, which you can apply using the patch command:

```
cd prelude-manager  
patch -p1 < ~/downloaded-patch.diff
```

Prelude-Manager 0.9.11.2 will be released shortly.
