Target version:	0.9.13		
Resolution:	duplicate		

Description

I have been working with prelude ids for a while now and am still having a hard time getting sensors to show up on the prewikka front end. I have followed the handbook and googled other errors I have come across. But in this case I can not find a remedy. I have seen other tickets with the asociated problem but have not seen a rememdy. Any help would be highly appreciated. I love the program and can not wait to see it in action. Thanks in adavance.
