Description

Below is the error i receive when i try to install sancp candidate 5. 1.61 works fine, but once i use the release candidates with prelude support, the install fails. any help will be appreciated.

```
maker1: Entering directory @/root/sancp-1.6.1d/sancp-1.6.2-candidate.C.3'  
g++ -Wall -O3 -s -I/usr/local/include -I./ -L/usr/lib/libpcap.so.0.9.4 -L/usr/lib -Xlinker -rpath -Xlinker /usr/lib @libprelude-config --cflags@ -c build_acl.cc -o build_acl.o  
build_acl.cc: In function
```

- Resolution set to fixed

Thanks for the report.

This was actually a problem from [SanCP](#), that my attached patch fixes. I'll report it upstream.
