Description

Hi,

I'm using prelude-correlator and I having problems setting up brute-force attack.

18 Sep 16:08:52 (process:9522) ERROR: LUA error on 'brute_force': /usr/local/share/prelude-correlator/lua/lib.lua:54:
set(alert.impact.severity): unable to create path: Unknown IDMEF child 'impact'. (lua.c:148 lua_run)

in the code:

ctx:set("alert.impact.severity", "high")

impact.description is also getting errors

History

Hi,

From an IDMEF point of view, impact is a child of assessment (not alert), so the rule should use "alert.assessment.impact.severity".

Could you try the attached patch ?

Pierre

- Status changed from New to Closed

- Resolution set to fixed

Thanks for reporting the issue, it has already been solved as of r10805.
Regards,

#3 - 09/19/2008 04:04 PM -

Hi,

I tried myself that yesterday and was not working, I will later post the error here.

Regards,

Rui
