Libprelude - Bug #319

Prelude-manager won't work after libprelude 0.9.20.2 -> 0.9.21

10/03/2008 02:17 PM -

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:	Yoann VANDOORSELAERE		**% Done:**	0%
Category:			**Estimated time:**	0.00 hour
Target version:	0.9.22			
Resolution:	fixed			

Description

I've updated libprelude from 0.9.20.2 to 0.9.21 but found that prelude-manager refuses to start now, It writes to log:

```
prelude-manager: ERROR: error opening directory '/usr/local/prelude/prelude-manager': No such file
 or directory. (idmef-message-scheduler.c:588 idmef_message_scheduler_init)
```

This directory never exists. Configure options were the same. After I've rolled back to 0.9.20.2 I was able to start prelude-manager.

0.9.20.2 -> /usr/local/lib/libprelude.so.2.15.3
0.9.21   -> /usr/local/lib/libprelude.so.2.16.0

History

#1 - 10/03/2008 02:24 PM -

Sorry, forgot to add second error line from log:

prelude-manager: ERROR: couldn't initialize alert scheduler. (prelude-manager.c:259 main)

#2 - 10/03/2008 03:08 PM - Yoann VANDOORSELAERE

The problem happen when specific path, outside of the provided installation prefix are used. Could you please try the attached patch?

#3 - 10/03/2008 03:20 PM -

Patch doesn't help much (the same error, different path):

prelude-manager: ERROR: error opening directory '/usr/local//var/spool/prelude/prelude-manager': No such file or directory. (idmef-message-scheduler.c:588 idmef_message_scheduler_init)

prelude-manager: ERROR: couldn't initialize alert scheduler. (prelude-manager.c:259 main)

I've configured libprelude with configure --localstatedir=/var

#4 - 10/03/2008 03:28 PM - Yoann VANDOORSELAERE

Thanks for the report, completed patch attached.

#5 - 10/03/2008 03:48 PM -

Thanks, yoann. It works.

#6 - 10/03/2008 04:58 PM - Yoann VANDOORSELAERE

Here's another update, that fixes some problem with the previous patch. Can you confirm that it still work as expected?

#7 - 10/03/2008 05:13 PM -

Applied, started. Seems to work.

#8 - 10/03/2008 05:20 PM - Yoann VANDOORSELAERE

- Resolution set to fixed

(In r11052) Fix path issue in case libprelude was configured with specific path
outside of $prefix (fix #319).

#9 - 04/29/2009 12:04 PM - Yoann VANDOORSELAERE

- Project changed from PRELUDE SIEM to Libprelude

- Category deleted (1)

- Target version deleted (92)
