<b>Description</b>			
Hi,			
I'm trying to filter events for relaying. For instance I want to relay <b>only</b> a set of events defined by me, e.g., if they match a certain pattern.			
Right now, prelude-manager is forwarding all events that it receives. Is there anyway to turn of relaying for all events and forward only the ones I want?			
Keep on good working smile.png			
Best regards and thanks in advance,			
Rui

- Resolution set to invalid

Hi,

Prelude-Manager provides filtering features in the through the idmef-criteria, and the thresholding plugins. More information concerning this topic is available in the [[PreludeManager]] documentation. Additionally, please use the [MailingLists](#) for asking question.
