#### Description

The output of precludedb-admin was:

delete event failed: Lost connection to [[MySQL]] server during query.

Error at transaction 448000. Use --offset 874000 to resume operation.

2152124949 'delete' events processed in 2783.401760 seconds (0.000001 seconds/events - 773199.535880 delete/sec average).

2152124949 events processed in 2783.401760 seconds (0.000001 seconds/events - 773199.535880 events/sec average).

2152124949 is the fake as '--offset 874000' says where it stopped.
