Target version:			
Resolution:			

Description

libpreludedb 0.9.15.1
postgresql 8.3 default installation
prelude-manager 0.9.14.2

```
preludeb-admin delete alert --criteria "alert.create_time < 2009-02-23" "type=pgsql name=prelude user=prelude pass=111"
```

Database is about 200GB size.

This command takes execution time more than 4 days, and can be more, but cisco router has been rebooted by network team.

This is tooo low. When executing, postgres deleting process takes about 80% CPU.

History

#1 - 05/31/2012 05:07 PM - Jean-Charles ROGEZ

- Project changed from PRELUDE SIEM to LibpreludeDB
- Category deleted (idmef)
