<b>Description</b>			
Dev,			
The following error was generated when building prelude-manager:			
Making all in include			
<b>Undefined symbols:</b>			
<b>"_rpl_open", referenced from:</b>			
<b>_dh_params_save in manager-auth.o</b>			
<b>ld: symbol(s) not found</b>			
<b>collect2: ld returned 1 exit status</b>			
<b>libtool: link: rm -f ".libs/prelude-managerS.o"</b>			
<b>make<sup>3</sup>: [prelude-manager] Error 1</b>			
<b>make<sup>2</sup>: [all-recursive] Error 1</b>			
<b>make<sup>1</sup>: [all-recursive] Error 1</b>			
<b>make: * [all] Error 2</b>			
All dependencies built without problems and in 64bit arch. A quick search suggested that it may be a problem with 'gnulib' but it probably isn't.
