Description

Dev,

I've built gnuTLS and all it's dependencies as static libraries with a 64 bit architecture. On running the manager, if I have the 'tls-option' activated, an entry is made in the logs that state I need gnuTLS version 2.2.0 or higher for this option to work even though I have version 2.10.2.

System.
------
iMactel 10.5.8
GCC 4.0.1
