The command "/etc/init.d/prelude-correlator stop" doesn't seem to work.

Fixed in e5da0b492192861de70b1160d05ada2fe45ca680

Replaced pidof by pgrep.

The previous fixe was bad.
The init script uses now pidfile and no longer pidof or pgrep.
Added the status function too.

Fixed in 67306475c53f8ca777ba58a09bd2d1a4ce057ba3

Status changed from Resolved to Closed
- Target version changed from 115 to Prelude OSS 1.0.1
