Description

Dear Prelude Team

I do appreciate your work on Prelude-IDS.

I have fully installed the Prelude-IDS on Redhat 6.7 and Prewikka as well, for studying security purpose in order to get a master degree

but when i run the prewikka "prewikka-httpd -p 8001 -a localhost", the there are some errors as shown in text below

Traceback (most recent call last):

File "/usr/lib64/python2.6/logging/handlers.py", line 883, in emit

smtp = smtplib.SMTP

File "/usr/lib64/python2.6/smtplib.py", line 244, in *init*

(code, msg) = self.connect(host, port)

File "/usr/lib64/python2.6/smtplib.py", line 301, in connect

(code, msg) = self.getreply()

File "/usr/lib64/python2.6/smtplib.py", line 345, in getreply

raise SMTPServerDisconnected("Connection unexpectedly closed")

SMTPServerDisconnected: Connection unexpectedly closed

Did i missed install something?

What I have to do!!

Please I need help.

I'm so sorry for my English

Hello,

Please check your [log smtp] section configuration in prewikka.conf.

Regards

#2 - 12/02/2015 04:55 AM - Emad Alsai

Dear Antoine LUONG

I added the following lines into the configuration of httpd "/etc/httpd/conf/httpd.conf"

```
<VirtualHost *:80>
```

```
ServerName my.server.org
```

```
Setenv PREWIKKA_CONFIG "/etc/prewikka/prewikka.conf"
```

```
<Location "/">
AllowOverride None
Options ExecCGI
```

```
&lt;IfModule mod_mime.c&gt;
    AddHandler cgi-script .cgi
&lt;/IfModule&gt;
```

```
Order allow,deny
    Allow from all
&lt;/Location&gt;
```

```
Alias /prewikka/ /usr/share/prewikka/htdocs/
ScriptAlias /prewikka /usr/share/prewikka/cgi-bin/prewikka.cgi
```

```
</VirtualHost>
```

Then I restart the httpd by issuing this command:
service httpd restart

When open Firefox and write <http://localhost/prewikka>
I got this message:

Forbidden

You don't have permission to access /prewikka on this server.
Apache/2.2.15 (Red Hat) Server at localhost Port 80

Thanks a lot
I really appreciate your help

This may be a firewall issue.

For running Prewikka 1.2.6 with Apache, please see the [wiki](#).
